

1) Reading UID screen.

The screenshot displays the 'Verifinc' mobile application interface. At the top, a status bar shows system icons and the time 12:29. Below this is a red header with the 'Verifinc' logo. Two buttons, 'Verify UID' and 'Verify VUID', are positioned below the header. The main form consists of several input fields: 'UID', 'Customer Name', 'Customer Email', and 'Customer Phone'. A 'Verify' button is located at the bottom of the form.

If user tries to Verify without reading the UID this alert is shown.

If customer details are not enter then it will give error message.

Once UID and customer details are enter. And click on Verify button it will navigate to another tab i.e. VUID tab with VUID details and company details.

Verify VUID

Company

0000010

Product Code

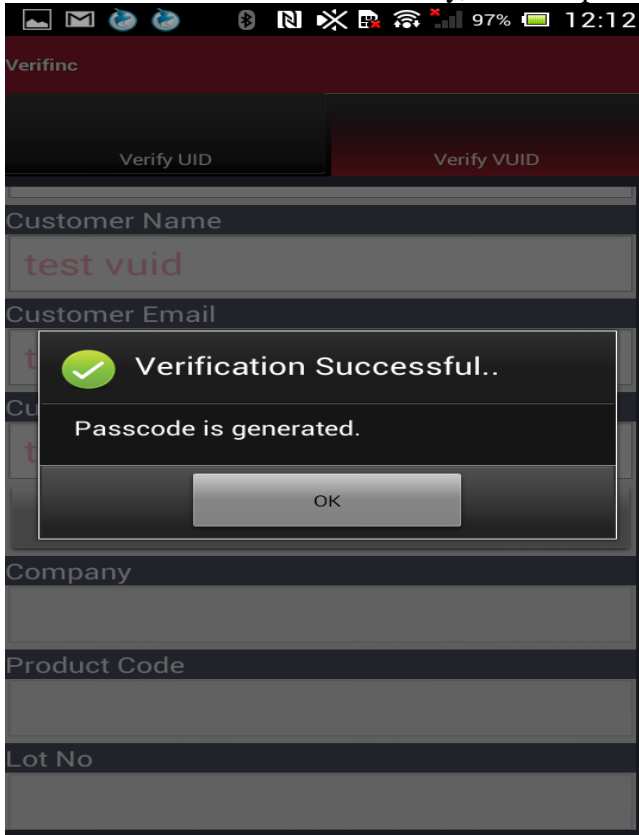

8

Till the time user verifies the VUID and gets passcode, "Verify passcode" button is disabled.

The screenshot shows a mobile application interface with a red header bar labeled "Verifine". Below the header, there are two tabs: "Verify UID" (which is currently selected) and "Verify VUID". The main content area contains several input fields with red text, each followed by a "Verify" button. The fields and their values are: "test" (with a "Verify VUID" button), "Company" (0000010), "Product Code" (8), "Lot No" (38), and "Expiry" (2-2014). Below these fields is a "Passcode" field, which is currently empty. At the bottom of the form is a "Verify Passcode" button. The status bar at the top of the screen shows various icons, a 98% battery level, and the time 12:10.

Field	Value	Action Button
test	test	Verify VUID
Company	0000010	Verify
Product Code	8	Verify
Lot No	38	Verify
Expiry	2-2014	Verify
Passcode		Verify Passcode

Once VUID is verified successfully, random passcode for the same is returned.

Once user gets passcode and clicks on “verify passcode” button, following message is displayed for valid VUID + Passcode combination
